EndNote® End User License Agreement

THE TERMS AND CONDITIONS OF THIS AGREEMENT SHALL NOT APPLY IF YOU HAVE OBTAINED ACCESS TO THIS PRODUCT PURSUANT TO AN INSTITUTIONAL SITE LICENSE. UNDER SUCH CIRCUMSTANCES, YOUR USE OF THIS PRODUCT SHALL BE GOVERNED SOLELY BY THE TERMS AND CONDITIONS OF SUCH LICENSE. If you would like to understand more about all of the rights that you or your employer have to use the Product, you should refer to the institutional site license agreement between you or your employer and Clarivate or authorized resellers.

BACKGROUND. Camelot UK Bidco Limited ("Clarivate Analytics") has developed a proprietary software application known as EndNote® (the "Software"). By using the Software and/or its accompanying manuals (the "Documentation" and together with the Software, the "Product"), you (the "End User") agree with Clarivate Analytics to be bound by the terms and conditions set forth herein. Clarivate Analytics is willing to permit you to use the Product only upon the condition that you accept and comply with all of the terms of this agreement ("Agreement").

THEREFORE, for good and valuable consideration, including the rights and license granted in this Agreement, and intending to be legally bound, Clarivate Analytics and End User agree as follows:

☒ I accept the license agreement

☐ I do not accept the license agreement

Windows 介面設計

The screenshot displays the SRIS Library Manager application window. The interface is divided into several functional areas:

- Top Menu Bar:** Includes 'File', 'Edit', 'References', 'Groups', 'Library', 'Tools', 'Window', and 'Help'.
- Left Sidebar:**
 - Sync Status:** A section for managing synchronization.
 - Reference Lists:** Includes 'All References' (10), 'Recently Added' (10), 'Unfiled' (10), and 'Trash' (0).
 - MY GROUPS:** A section for managing groups, with a sub-item 'My Groups'.
 - Search for group:** A search bar at the bottom of the sidebar.
- Main Panel:**
 - Library 中搜尋:** A search bar with a magnifying glass icon and a link to 'Advanced search'.
 - All References:** A section showing '10 References'.
 - 快捷鍵:** A row of icons for quick actions: a double quote, a plus sign, a person icon, a share icon, a magnifying glass, and a globe.
 - Table:** A table listing references with columns: Author, Year, Reference Type, Title, and Journal. The first row is highlighted in green.
- Right Panel:**
 - Summary:** A section showing the title 'Lazarus-2021-A global surv...' and a link to 'Attach file'.
 - Details:** A section showing the full title 'A global survey of potential acceptance of a COVID-19 vaccine' and the authors 'J. V. Lazarus, S. C. Ratzan, A. Palayew, L. O. Gostin, H. J. Larson, K. Kimball, S., & El-Mohandes, A. (2021)'. It also shows the journal 'Nat Med 2021 vol. 27 issue 2 Pages 225-228'.
 - Format:** A section showing the citation format 'APA 7th' and buttons for 'Insert' and 'Copy'.

Annotations in purple boxes highlight specific features:

- 總功能:** Points to the top menu bar.
- 分頁功能:** Points to the 'All References' tab.
- Library 中搜尋:** Points to the search bar in the main panel.
- 快捷鍵:** Points to the row of action icons.
- 書目資料:** Points to the table of references.
- 詳細書目資料、編輯、PDF預覽:** Points to the right panel's summary and details sections.
- 書目格式預覽:** Points to the right panel's format section.
- 同步參考文獻分類群組找全文狀態連線資料庫檢索搜尋 Group:** Points to the left sidebar's 'MY GROUPS' and 'Search for group' section.

A Case Series of Children With 2019 Novel Coronavirus Infection: Clinical and Epidemiological Features

J. H. Cai, J. Xu, D. J. Lin, Z. Yang, L. Xu, Z. H. Qu, et al.

Clinical Infectious Diseases 2020 Vol. 71 Issue 6 Pages 1547-1551

Accession Number: WOS:000582709700030 DOI: 10.1093/cid/ciaa198

We first described the 2019 novel coronavirus infection in 10 children occurring in areas other than Wuhan. The coronavirus diseases in children are usually mild and epidemiological exposure is a key clue to recognize pediatric case. Prolonged virus shedding is observed in respiratory tract and feces at the convalescent stage.

Supplementary table 1 | Equations describing the 'Likely water' cluster hull and cluster overlaps in the multidimensional feature-space.

These equations describe the 'Likely water' cluster in the multidimensional feature-space. By definition, part of this cluster contain pixels that are not water, and request additional processing steps to be properly assigned. The method section provides details about the usages of this equations within the expert system classifier.

摘要
In vitro transcribed (IVT) mRNA has recently come into focus as a potential new drug class to deliver genetic information. Such synthetic mRNA can be engineered to transiently express proteins by structurally resembling natural mRNA. Advances in addressing the inherent challenges of this drug class, controlling the translational efficacy and immunogenicity of the IVTmRNA, provide the basis for a broad range of potential cancer immunotherapies and infectious disease vaccines have entered clinical development. Meanwhile, emerging novel in vivo delivery of IVT mRNA to replace or supplement proteins, IVT mRNA-based generation of pluripotent stem cells and genome engineering using IVT mRNA-encoded designer nucleases. This Review provides a comprehensive overview of the current state of mRNA-based drug

Saifeddin Alsalameh, Rayya Amin, Takafumi Gemba, and Martin Lotz

Objective. To determine the presence of mesenchymal progenitor cells (MPCs) in human articular cartilage.

Methods. Primary cell cultures established from normal and osteoarthritic (OA) human knee articular cartilage were analyzed for the expression of CD166, cell surface markers whose coexpression with CD133 identifies mesenchymal stem cells (MSCs) in bone marrow stroma. The potential of cartilage cells to differentiate to adipogenic, osteogenic, and chondrogenic

capable of chondrocytic differentiation and formed cartilage tissue in micromass pellet cultures.

findings indicate that in adult human articular cartilage, the frequency is increased as implicating the capacity of a subset of cells that these progenitor cells might be involved in the pathogenesis of arthritis.

mRNA-based therapeutics — developing a new class of drugs

Ugur Sahin^{1,2}, Katalin Karikó^{2,3} and Özlem Türeci¹

Abstract | In vitro transcribed (IVT) mRNA has recently come into focus as a potential new drug class to deliver genetic information. Such synthetic mRNA can be engineered to transiently express proteins by structurally resembling natural mRNA. Advances in addressing the inherent challenges of this drug class, particularly related to controlling the translational efficacy and immunogenicity of the IVTmRNA, provide the basis for a broad range of potential applications. mRNA-based cancer immunotherapies and infectious disease vaccines have entered clinical development. Meanwhile, emerging novel approaches include in vivo delivery of IVT mRNA to replace or supplement proteins, IVT mRNA-based generation of pluripotent stem cells and genome engineering using IVT mRNA-encoded designer nucleases. This Review provides a comprehensive overview of the current state of mRNA-based drug technologies and their applications, and discusses the key challenges and opportunities in developing these into a new class of drugs.

The concept of nucleic acid-encoded drugs was conceived over two decades ago when Wolff *et al.*¹ demonstrated that direct injection of in vitro transcribed

access the nucleus to be transcribed into RNA, and their functionality depends on nuclear envelope breakdown during cell division. In addition, IVT mRNA based ther

The relationship between sleep quality and fibromyalgia symptoms

A. Andrade, G. T. Vilarino, S. M. Sieczkowska, D. R. Coimbra, G. G. Bevilacqua and R. D. K. Steffens

Journal of Health Psychology 2020 Vol. 25 Issue 9 Pages 1176-1186

Accession Number: WOS:000553450000003
DOI: 10.1177/1359105317751615

This study investigated the relationship between sleep quality and fibromyalgia symptoms in 326 patients. The Pittsburgh Sleep Quality Index was used to assess the presence of sleep disorders. Multivariate analysis of variance was performed to determine the influence of fibromyalgia symptoms on sleep quality. The prevalence of sleep disorders was 92.9 percent. Patients reported generalized pain (88.3%), memory failure (78.5%), moodiness (59%), excessive anxiety (77.5%), and concentration difficulties (69.1%). Patients with more symptoms reported poor sleep quality (p < .05;d = .74), and the total Pittsburgh Sleep Quality Index score correlated with the number of symptoms (p < .01). Sleep quality has an important association with fibromyalgia symptoms.

Abstract
Background: Although sleep hygiene education represents a promising approach for patients with poor sleep quality, little research has been devoted in understanding the sleep hygiene behavior and knowledge of working women. Purpose: The purpose of this study was to investigate the efficacy of a short-term sleep hygiene education program on working women with poor sleep quality.

s in the chest, restlessness, manic or depressive psychosis, nausea or vomiting, hiccups, gastric pain, and distension in the upper abdomen (Chen *et al.*, 2001). Since the parasympathetic modulation of both heart and gut is mediated by the vagus nerve, and since vagal stimulation of the gut can result in increased gastric motility (Chen *et al.*, 2001), the vagal stimulation of the heart can result in decreased heart rate (Chen *et al.*, 2001). It is speculated that to some extent the pericardium meridian reflects the autonomic nervous modulation of the subject.

Acupressure at the Neiguan (P6) point, the most frequently used point on the pericardium meridian, has been shown to lessen nausea and vomiting (Dunne *et al.*, 1989a and b; Ho *et al.*, 1989; De Aloysio and Penacchioni, 1992; Eick *et al.*, 1997; Harmon *et al.*, 2000). Because nausea and vomiting are associated with autonomic nervous activity (Morrow *et al.*, 1992; Morrow *et al.*, 1992), the autonomic nervous activity might be changed when acupressure is performed.

Variability analysis is a useful non-invasive technique for the assessment of autonomic modulation of heart rate. Some diseases are associated with autonomic nervous activity, and the restoration of vagal modulation is a key factor in the treatment of these diseases.

Abstract

The SARS-CoV-2 virus, which causes Covid-19, induced a global pandemic. An effective cure, either in the form of a drug or vaccine, has yet to be discovered. In brief months that the world has known Covid-19, there has been an unrelenting stream of papers published related to this disease, either in a bid to find solutions or applied or related aspects. Data from Clarivate Analytics' Web of Science and Scopus, which do not index preprints, were assessed. Our estimates of unique documents, 9960 of which were in common to both databases, between January 1 and June 30, 2020. Publications include research articles, notes and reviews. As one example, amongst the 21,542 documents were research articles, 22.4% were letters, and the rest were reviews or other. Based on both databases, the top three countries, ranked by number of papers, are the USA, China, and Italy while *BMJ*, *Journal of Medical Virology* published the largest number of Covid-19-related papers. The snapshot of how the publishing landscape has evolved in the first six months of response to this pandemic and discusses the risks associated with the

下午12:00 (0 分鐘前)

██████████ would like to share an EndNote library with you.

To accept this invitation and access Jamie 's library, you must have EndNote X7.2 or later installed, and we strongly recommend using EndNote 20 for the best experience.

Once you've accepted this invitation, you will be able to access all of the references, PDFs, file attachments, and notes in this shared library from your EndNote desktop application.

Accept: <https://account.endnote.com/enwservices/invitation/#/f252b9dd-2e25-4640-8443-10dfc69ff700>

Don't have EndNote for desktop? Get the free trial version now to access shared libraries and much more. http://endnote.com/buy?utm_source=en-desktop&utm_medium=email&utm_campaign=ls-email-ro&utm_content=buy-en

透過連結進入

Learn more about sharing your research with EndNote. http://endnote.com/?utm_source=en-desktop&utm_medium=edm&utm_campaign=ls-email-ro&utm_content=learn-more

If you do not wish to accept this invitation, please notify ██████████ directly.

Jamie has invited you to join a shared
EndNote library.

[Learn More](#)

To accept this invitation, sign in using the same credentials you use when accessing EndNote online or syncing your desktop library, or create a new account. To access this shared library you must have EndNote X7.2 or later installed.

Sign In with your EndNote account

Email

Password

Accept

[Forgot your EndNote password?](#)

Create an EndNote account ?

First Name *

Last Name *

Email *

登入EndNote Online帳密

OR

完成邀請接受，即可使用

Invitation accepted. For access to Jamie's shared EndNote library, follow these instructions.

Share Library 使用方式

Update EndNote to version X7.2 or later

Now, go to the desktop to make sure you're on the latest version. To check:

Windows

1. Click on **Help > About**
2. Click on **Program Updates** or download the [installer](#).

You can now access the shared library from your desktop.
Just go to File > Open Shared Library.

OS X

1. Click on the **EndNote** menu dropdown.
2. Click on **Check for Updates** or download the [installer](#).

You can now access the shared library from your desktop.
Just go to File > Open Shared Library.

Fears of second coronavirus outbreak hit global shares

Chapter 1

Share prices had gained in recent weeks amid hopes that the economy would rebound as authorities loosened restrictions put in place to try to slow the spread of the virus.(Bagheri et al., 2021; Silva et al., 2020)

Last week's surprise report showing US employers had restarted hiring in May helped to push the tech-heavy Nasdaq index to new highs(Haibo et al., 2020; Sharma et al., 2020).

But the recovery remains tentative. On Thursday, the US Labor Department reported that another 1.5 million people had filed new unemployment claims last week. More than 30 million continue to collect the benefits, it said.

摘要

BackgroundAlthough people of all ages are susceptible to the novel coronavirus infection, which is presently named "Coronavirus Disease 2019" (COVID-19), there has been relatively few cases reported among children. Therefore, it is necessary to understand the clinical characteristics of COVID-19 in children and the differences from adults. Case presentationWe report one pediatric case of COVID-19. A 14-month-old boy was admitted to the hospital with a symptom of fever, and was diagnosed with a mild form of COVID-19. The child's mother and grandmother also tested positive for SARS-CoV-2 RNA. However, the lymphocyte counts were normal. The chest computed tomography (CT) revealed scattered ground glass opacities in the right lower lobe close to the pleura and resorption after the treatment. The patient continued to test positive for SARS-CoV-2 RNA in the nasopharyngeal swabs and stool at 17days after the disappearance of symptoms. ConclusionThe present pediatric case of COVID-19 was acquired through household transmission, and the symptoms were mild. Lymphocyte counts did not significantly decrease. The RNA of SARS-CoV-2 in stool and nasopharyngeal swabs remained positive for an extended period of time after the disappearance of symptoms. This suggests that attention should be given to the potential contagiousness of pediatric COVID-19 cases after clinical recovery.

Human and novel coronavirus infections in children: a review

📄

🔒

🕒

[Rajapakse, N and Dixit, D](#)
Jan 2 2021 | Jun 2020 (早期取閱) | [PAEDIATRICS AND INTERNATIONAL CHILD HEALTH](#) 41 (1) , pp.36-55
Coronaviruses, seven of which are known to infect humans, can cause a spectrum of clinical presentations ranging from asymptomatic infection to severe illness and death. Four human coronaviruses (hCoVs)-229E, HKU1, NL63 and OC43-circulate globally, commonly infect children and typically cause mild upper respiratory tract infections. Three novel coronaviruses of zoonotic origin ha' ... [顯示更多](#)

2019 Novel Coronavirus Infection in Children and Infants: Where We Are and What We Know?

📄

🔒

[Deravi, N; Yaghoobpoor, S; \(...\); Vaezjalali, M](#)
Oct 2020 | [ARCHIVES OF CLINICAL INFECTIOUS DISEASES](#) 15 (5)
Since the outbreak of coronavirus disease 2019 (COVID-19), in Wuhan, China, there were more than 10,021,401 confirmed infected cases. This infection has spread to almost all countries around the world with reported high mortality and morbidity. Infections in children and infants have been reported as well. The condition of the infected children was mostly mild. To date, there have been ... [顯示更多](#)

解決方式

【步驟 1】：請至 EndNote Library 上方 Help → About EndNote 20，如下圖。

如 Window 版本不是 EndNote 20.4.1 或 Mac 版本不是 EndNote 20.4 則請照【步驟 2】執行。

【步驟 2】：請請至 EndNote Library 上方 Help → Check for updates → Download and Install 完成更新即可(目前 EndNote 20 for Win 最新版本為 EndNote 20.4.1，而 EndNote 20 for Mac 最新版本為 EndNote 20.4)如下圖。

(執行該功能時，請注意須確實關閉所有 Office 應用程式)

- B. 撤稿警示為使用者於引用書目資料期間，為防該資料遭撤稿而設置之提醒功能，此功能與 Retraction Watch 資料庫連結，使用者首先須有一組 EndNote Online 個人化帳號密碼(免費註冊)，如尚未註冊且需使用該功能，請參考以下步驟執行。

設定方式

【步驟 1】：請點按 EndNote Library 上方 Help → EndNote online，如下圖。

【步驟 2】：請點按下圖 Register 頁面完成 EndNote 個人化帳號註冊流程。

Sign in to continue with EndNote

Experience the full power of EndNote. Upgrade to EndNote 20 for desktop today. [Buy now](#)

Collaborate easier
Share selected groups of references, manage team access, and track activity and change

Write faster
Automatically create, format, and update bibliographies with the convenience of remote access

Get published
Powered by Web of Science, uncover the impact of references and find the best-fit journal for your papers

【步驟 3】：完成 EndNote 個人化註冊後，請至 EndNote 作業環境底下，先至左上角點按 Sync Configuration→再至右上角點按 Sync Now，於彈跳視窗中輸入完成註冊之有效個人化 EndNote 帳號密碼。

【步驟 4】：依序完成上述流程步驟，如日後匯入已出版之書目資料發生撤稿等狀況，則 EndNote 將顯示下圖警示；若於 Word 有插入遭撤稿書目時，亦會有相關警示提醒。

Predatory publishing in Scopus: evidence on cross-country differences

V. Machacek and M. Srolovec

Scientometrics 2021 Pages 1-25

Accession Number: 33583977 PMID: PMC7867864 DOI: 10.1007/s11192-020-03852-4

<https://www.ncbi.nlm.nih.gov/pubmed/33583977>

Predatory publishing represents a major challenge to scholarly communication. This paper maps the infiltration of journals suspected of predatory practices into the citation database Scopus and examines cross-country differences in the propensity of scholars to publish in such journals. Using the names of "potential, possible, or probable"
