# UNDERSTANDING OPEN RESEARCH FOR HSS

Research funders, institutions and publishers are increasingly talking about Open Research. As a broad term which encourages accessibility, transparency and reproducibility of research and supporting information, Open Research includes the practices of sharing data, code, preprints, methods, or working in new ways such as Registered Reports.

In this webinar, aimed at researchers in the Humanities and Social Sciences (HSS), we will present the core tenets of open research and contextualise HSS within open research. We will then discuss the opportunities and challenges for HSS in moving to more open research practices, as well as how concepts of openness can apply to HSS research data.

## SPEAKER

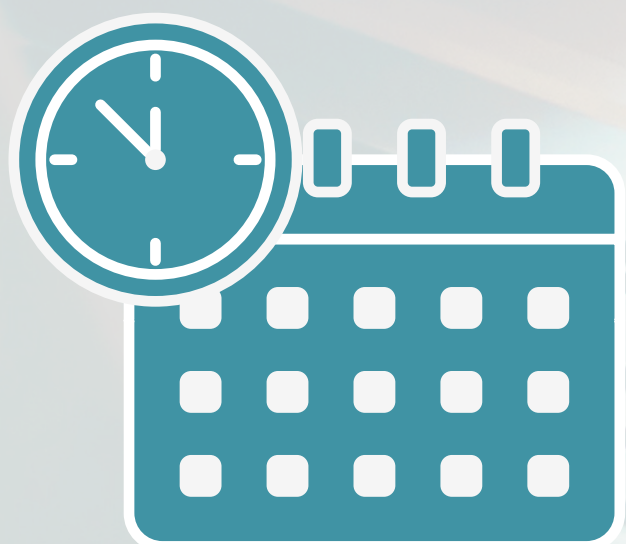

**Matt Cannon**

Head of Open Research for Taylor & Francis

**Dr. Rebecca Taylor-Grant**

Head of Open Data Initiatives at Taylor & Francis

## EVENT DETAILS

**8 MAY 2024**

**7.00PM - 8.00PM (GMT+8)**

# EXCELLENCE IN PEER REVIEW

## *How to be an effective peer reviewer*

Whether an article can be accepted or not depends on the opinions of the reviewers. However, even experienced reviewers may not always be clear on what to focus on during the peer review process. So, we hope that you can participate in this training, regardless of whether you are the author or the reviewer.

Here, we have summarized the opinions of various experts to help you sort out various aspects that need to be understood during the peer review process. Including:

- An overview of the different types of peer review
- The responsibilities of a peer reviewer
- What are the reviewers focusing on in peer review
- Ethical concerns in peer review

We offer certificates to participants who complete the workshop.

If you would like the opportunity to gain further experience as a reviewer and establish closer connections with journals, after attending this workshop, you can become a member of the Taylor & Francis Talent Pool.

## EVENT DETAILS

**22 MAY 2024**

**4.30PM – 6.00PM (GMT+8)**

Registration Link:
