ProQuest特定資料庫  
提供最新的AI功能來簡  
化你的學習過程與更容  
易掌握文獻內的內容

Harnesses AI's powerful capabilities and applies them in a responsible, reliable manner as a research companion for students.

- Easily craft more effective and targeted searches
- More effectively review, analyze, and interrogate documents
- Quickly evaluate the usefulness of each document for your research
- Get guidance on next steps like choosing a research topic and understanding key concepts in the document

The screenshot displays the ProQuest Central Premium interface. The main content area shows a document titled "Anti-environmentalists" from "The Economist" (March 16th 2024), categorized under "Finance & economics". The article title is "Free exchange | Anti-environmentalists". The text discusses the opposition of NIMBYs to new buildings on green grounds, noting that this increases carbon emissions. A cartoon illustration shows a person in a red hat looking over a fence. The Research Assistant sidebar on the right provides AI-generated insights, including a key takeaway: "Density lowers the per-person cost of public transport, which reduces car use and can lead to substantial emissions savings through policies like 'demolish and densify'." It also lists suggested sources, such as "Major CCS Pipelines Inch Closer to Reality" by Segrist, Sandy, Oil & Gas Investor (01 Aug 2024).

# ProQuest Research Assistant: AI Initiatives Address Two Main Research Paths

## 1: Starting on a document

Provides insight, guidance and next steps to users who start on a document

The screenshot shows the ProQuest One Health & Nursing interface. The main document is titled "Physicians, Spirituality, and Compassionate Patient Care" by Sulmasy, Daniel P. The Research Assistant sidebar is open, displaying a key takeaway: "Physicians must address patients' spiritual needs as part of compassionate care..." and additional topics discussed, including the role of chaplains, ethical considerations, and training for physicians. Suggested sources are also listed.

## 2: Starting with a search

Empower more targeted keyword searches

The screenshot shows the ProQuest One Business interface. A search query "china robot AND (supply chain) AND (robotics industry) AND (market analysis)" is entered in the search bar. Below the search bar, AI-generated suggestions are shown: "automation trends", "manufacturing efficiency", "technological innovation", "economic impact", and "global competition". The search results page displays 30,665 results, sorted by Relevance. A featured report titled "New Supply Chain Models: Disruptive Supply Chain Strategies for 2030 (Systematic Literature Reviews)" is highlighted.
